Sir,

I am a Life Fellow of IETE. I am thoroughly disappointed with my experience with IETE Hyderabad.

- For the past several months, I have not got a single technical correspondance from IETE. I did receive a communication for your IETE AGM and elections, but there has never been any invitation for any technical event. When you can send purely managerial and administrative communcations, why can you never send me any announcemnts/invitations for any technical event ?
- I am also flooded with meaningless newsletters, election campaigns, and similar garbage. But, I have never received a single technical journal or document. Neither have I received even a single electronic (pdf) version of any technical document. Am I expecting anything unreasonable from IETE ?

Your website seems to have *many* serious problems.

1. I notice that many of the pages mentioned in your website, return a 404 error. To make things worse, some of these pages lead me to bogus sites like Jabong, ace2three (rummy site), Facebook, and Mobistore etc. I can assure you, and prove to you, that my PC has no viruses or stuff like that. I never use Microsoft and am a strong user of Linux/FOSS. Moreover, I am a qualified computer scientist (Ph D) and I teach security and cryptography internationally.
2. There are no email addresses for any of the office bearers where I can report

these problems directly. Mails sent to info@ietehyd.org. are never responded to.

How do you expect your members to keep in touch or "be connected" under these conditions ?

I thought IETE is an organisation related to communications, and has many engineers in its fold.

I get a very poor image about IETE Hyderabad.

I give you *once again* all my details, as requested by you (Mr. Vijay Gupta), hoping that things will improve from your end. You already have all these details in your records, but I am repeating it *once again*. I have also sent these details by email.
