

Chapter 1

The current font size is:

`\T1/cmr/bx/n/24.88`

```
% Include the next three lines in the Preamble of your main document
\usepackage[T1]{fontenc}
\usepackage{lastpage}
\usepackage{printlen}
\newcommand\thefont{ The current font size is: \expandafter\string\the\font}
```

*** Begin document vital statistics ***

You can get to know some vital statistics of your \LaTeX document:

1. Predefined font sizes (in pt)
2. Predefined lengths (in mm)
3. Total number of pages

1.1 Get font sizes in use

In the book documentclass, the Chapter is the Section level #1.

1.2 The current font size is: `\T1/cmr/bx/n/14.4`

Subsection

1.2.1 The current font size is: `\T1/cmr/bx/n/12`

Subsubsection

The current font size is: `\T1/cmr/bx/n/10`

Body text

The current font size is: `\T1/cmr/bx/n/10`

Use the T1 encoding in the example because in the OT1 encoding the slot normally allotted to the backslash is occupied by a ”.

1.3 Get predefined lengths

`\textwidth` is 121.25221 mm
`\parindent` is 5.27184 mm
`\rightmargin` is 0 mm
`\leftmargin` is 8.78639 mm

1.4 Number of pages

This document contains 2 pages
